## Gender Based Violence in Emergencies

### Research Query: Humanitarian Financing for National/Local Women's Organizations and Groups

September 2020

### Introduction

**Purpose of this document:** Women around the world have lived experiences that are different from men, informed by norms that perpetuate gender inequality. This gender inequality in turn underpins multiple forms of violence that women and girls are exposed to across their lives. In humanitarian settings, certain types of violence against women and girls, (VAWG, also referred to as gender-based violence, or GBV) can increase. Women's organizations with expertise in addressing GBV are often best placed to identify and meet the needs of women and girls affected by GBV in their communities, as well as to undertake contextually relevant strategies to prevent GBV. This document was developed to identify potential sources of funding for local women's organizations. This list of donors is not exhaustive but serves as a starting point.

**Methodology:** This list of donors was identified using an on-line word search with a combination of the following words:

1. Humanitarian, emergencies, disaster, conflict, war,
2. Women, girls, women with disabilities, older women, women's rights, gender equality, gender-based violence,
3. Funders, funding, grants.

Additionally, relevant websites with a list of donors were scanned to see if any supported the combination of word concepts below. Where websites had limited information, donors were contacted directly for additional requirements.

- [AWID funders list filtering the word 'violence'](#)
- [Bond funders list](#)
- [Girls Not Brides: Where can I get Funding?](#)
- [COVID-19 related grants](#)

Women's organizations are encouraged to contact donors from this list directly in order to gather additional information about funding parameters.<sup>1</sup>

The information is organized according to the following categories, starting with donors that have the highest

<sup>1</sup> A handbook on fundraising for women's organizations can be found [here](#): content/uploads/2015/09/2015-Fundraising-Handbook.pdf This document is more tailored to development settings but nevertheless has useful tips for humanitarian women's organizations.

## likelihood to fund women's organizations in emergency situations<sup>2</sup>:

1. Financing focused on women in humanitarian settings: This funding is available directly to local women's organizations. These donors are known to invest in programs related to women/GBV and humanitarian needs.
2. Financing from multi-donor pooled humanitarian donors: These are typically larger grants that require national organizations with a dedicated grant writer and financial reporting systems. It may be that smaller women's organizations can identify bigger organizations in their own country that receive funding from this pool to apply to be a sub-grantee.
3. Financing focused on prevention or mitigation of violence: These funding sources do not explicitly mention funding local groups in humanitarian settings. However, donors listed here could be approached by women's organizations to explore the potential for funding - as these organizations are strong supporters of prevention of and response to GBV.
4. Financing focused on women and human rights: Again, these funding sources do not explicitly mention funding local groups in humanitarian settings but can still be approached by women's organizations to open a dialogue on opportunities for support.
5. Crowd Funding: A short overview of Crowd Funding as an alternative option to formal fundraising.

### 1.1 ELRHA Humanitarian Innovation Fund (HIF)

**Type of project funded:** ELRHA's Humanitarian Innovation Fund (HIF) provides funding support to innovative solutions addressing complex humanitarian issues. Funding calls, known as Innovation Challenges, are most commonly focused within thematic areas (i.e. GBV, Water & Sanitation, etc.), with each Challenge seeking solutions to specific priorities within the thematic area. There is usually at least one funding opportunity per thematic area per year, but this is dependent on needs/prioritized opportunities for innovation. Eligibility for any individual Challenge is dependent on the applicants' fit/ability to respond to the Challenge, though all solutions must be for humanitarian contexts.

## 6. Crowd Funding Opportunities

Another fundraising option for women’s organizations to consider is Crowd Funding. Websites such as (1) [globalgiving.com](https://www.globalgiving.com) or (2) [GoFundMe.com](https://www.gofundme.com) have been set up and have been able to raise funds of various amounts from the general public, including members of the diaspora living abroad. This method can rapidly activate cash as long as payment transfers between countries are viable. This grassroots option requires a compelling narrative, disseminated via the crowd funding website. Local or national women’s organizations who have allies or offices in other countries (e.g. Global North), featuring members with vibrant social networks, can start a campaign. The amount successfully fundraised depends on those who can be reached through the social networks of those disseminating the Crowd Funding website. Amounts fundraised typically range within 5USD-10,000 USD, which can be useful for some groups. Higher amounts have also been fundraised as seen below in the examples.

2. <https://www.globalgiving.org/projects/gender-based-violence-in-the-anglophone-silent-war/> (2,000 of 50,000 USD goal achieved)
